

Task 2

Question 1

```
2 #include <iostream>
3 using namespace std;
4 int main() {
5     float tem, celcius;
6     cout<<"M.Ibrahim____72404"<<endl;
7     cout<<"Enter temperature in Fahrenheit :|";
8     cin>>tem;
9     celcius=(5.0/9)*(tem-32);
10    cout<<"Temperature in celcius ="<<celcius<<endl;
11
12    return 0;
13 }
```

Output:

```
M.Ibrahim____72404
Enter temperature in Fahrenheit :867
Temperature in celcius =463.889
```

Question 2:

```
#include <iostream>
using namespace std;
int main() {
    Dfloat len,wid,height,vol;
    cout<<"M.Ibrahim____72404"<<endl;
    cout<<"Enter length of qube :";
    cin>>len;
    cout<<"Enter width of qube :";
    cin>>wid;
    cout<<"Enter height of qube :";
    cin>>height;
    vol=(len*wid*height);
    cout<<"volume of cube ="<<vol<<endl;
    return 0;
```

output 2:

```
M.Ibrahim____72404
Enter length of qube :4
Enter width of qube :3
Enter height of qube :5
volume of cube =60
```

Question 3:

```
#include <iostream>
using namespace std;
int main() {
    float sub1,sub2,sub3,sub4,sub5,sum,avg;
    cout<<"M.Ibrahim____72404"<<endl;
    cout<<"Enter marks in chemsitry :";
    cin>>sub1;
    cout<<"Enter marks in physics :";
    cin>>sub2;
    cout<<"Enter marks in Bio :";
    cin>>sub3;
    cout<<"Enter marks in Math :";
    cin>>sub4;
    cout<<"Enter marks in Islamiyat :";
    cin>>sub5;
    sum=sub1+sub2+sub3+sub4+sub5;
    avg=sum/5.0;
    cout<<"Total marks  ="<<sum<<endl;
    cout<<"Averge ="<<avg<<endl;
    return 0;
}
```

Output

```
M.Ibrahim____72404
Enter marks in chemsitry :65
Enter marks in physics :76
Enter marks in Bio :8
Enter marks in Math |:76
Enter marks in Islamiyat :56
Total marks  =281
Averge =56.2
```
